and infinitely recyclable

DISPOSABLE ALUMINIUM PLATES & CIRCULAR ECONOMY

Being infinitely recyclable Aluminium can be considered the circular material for excellence.

Through recycling, aluminium is transformed into a new material, without losing its properties.

A SUSTAINABLE SUPPLY CHAIN

Founded in 1991, Contital is part of Laminazione Sottile Group, European leader in the production of rolled aluminium for food packaging.

Laminazione Sottile Group has an integrated production process starting from the melting of primary and recycled aluminium, then transformed into bare and lacquered rolled products, up to finished products suitable for food contact.

In this way it can optimize processes to improve environmental sustainability and ensure:

**SAFETY AND QUALITY
OF RAW MATERIAL**

FOOD SAFETY

THE 100% SUSTAINABLE CHOICE

The disposable plates line of Contital is made with **100% recycled aluminium**, by its nature infinitely recyclable with a 95% reduction in energy consumption..

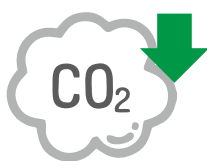

Aluminium
and environment

did you know...

Italy ranks first in Europe in terms of **recycled aluminium** (80.2%).

In Italy, thanks to the recycling of 54,300 tons of aluminium packaging, greenhouse emissions of **403 thousand tons of CO₂** have been avoided.

Our range of disposable aluminium plates complies with the UNI EN 13430: 2005 standard about requirements for packaging recoverable by material recycling
